| Combined odds                               | <b>+732</b>                          |
| Est. hit probability: 14% (52% × 50% × 54%) | <b>\$50 stake → returns \$416.18</b> |

**The math behind the card.** Every bet lists our estimated win probability next to the de-vigged market probability — we only bet where our number beats the market's. Summing the probabilities, we expect **~3.9 of 8 bets to cash** on an average day, and the card's total expected value is **≈ +\$45** (+4.5% on the bankroll). If all 8 hit: **\$2,226 returned (+\$1,226)**. If everything dies: −\$1,000. The longshot doubles down on our three value legs — if the card has a great day, it has a very great day.

ALLOCATION SUMMARY
