FEATURED GAME ANALYSIS

GIANTS ML -155 · SAFEST PLAY

ROCKIES @ GIANTS · ORACLE PARK

- ▶ Lorenzen is 3-9 with a 6.46 ERA and 1.4 HR/9 — worst starter on the slate
- ▶ McDonald's 3.98 FIP says he's much better than his 5.46 ERA
- ▶ Rockies remain MLB's worst road team; Oracle suppresses their contact profile

Est. win: 62% vs 58% market — biggest gap between team quality and price

ATHLETICS ML -104 · PITCHING MISMATCH

ATHLETICS @ WHITE SOX

- ▶ J.T. Ginn: 3.10 ERA overall, a sparkling 2.49 ERA on the road
- ▶ Schultz is 2-6, 6.00 ERA with 5.4 BB/9 — command has collapsed
- ▶ Book still prices this near even; the gap is the bet

Est. win: 54% vs 49% market — clearest starter mismatch priced as a coin flip

TIGERS ML -115 · THE ACE DUEL

PHILLIES @ TIGERS · WHEELER VS SKUBAL

- ▶ Skubal at home: 10.7 K/9, 1.3 BB/9 — best strikeout-to-walk profile in the AL
- ▶ Wheeler (9-1, 2.28) is elite too — this hinges on the bullpens
- ▶ Detroit pen since June 1: 3.10 ERA (3rd). Philly pen: 5.41 (26th)

Est. win: 55% vs 51% market — late innings decide it, and Detroit's pen is far better

PIRATES ML +104 · SKENES DAY

BREWERS @ PIRATES · PNC PARK

- ▶ Skenes' 2.98 FIP beats his 3.58 ERA; 7+ Ks in 8 straight Sunday day starts
- ▶ Gasser's 4.98 FIP flags regression; Brewers lost 3 of last 4
- ▶ Pirates swept Saturday's doubleheader, lead MLB in home scoring (5.5 R/G), rank 2nd in team AVG (.261)

Est. win: 52% vs 47% market — plus money on the best pitcher on today's slate at home

REDS ML +108 · THE STREAK

CUBS @ REDS · GREAT AMERICAN BALL PARK

- ▶ Abbott has allowed 3 ER or fewer in 14 consecutive starts
- ▶ Boyd's 4.31 ERA is trending the wrong way since June
- ▶ Home dog with the more reliable starter — classic value profile

Est. win: 50% vs 46% market — a true coin flip priced at plus money

UNDER 9.5 -114 · ROYALS @ ORIOLES

TOTALS PLAY · CAMDEN YARDS

- ▶ Royals are dead last in road scoring at 3.8 runs per game
- ▶ Baz's 3.78 FIP is solid despite the 4-9 record
- ▶ 9.5 is a high bar when one lineup barely scores on the road

Est. win: 55% vs 52% market — the number is set for Camden's park factor, not this KC lineup

8 · Longshot Parlay (3 legs) Pirates ML + Reds ML + Athletics ML · details below	+732	\$50	14% mkt 10%	+\$366.18	LONGSHOT

THE MANDATORY LONGSHOT

"VALUE STACK" 3-LEG PARLAY · \$50 STAKE

Pirates ML (Skenes at home) **✓ HIT** **+104**

Reds ML (Abbott's streak) **+108**

Athletics ML (Ginn vs Schultz) **-104**

Combined odds **+732**

Est. hit probability: 14% (52% × 50% × 54%) **\$50 stake → returns \$416.18**

The math behind the card. Every bet lists our estimated win probability next to the de-vigged market probability — we only bet where our number beats the market's. Summing the probabilities, we expect **~3.9 of 8 bets to cash** on an average day, and the card's total expected value is **≈ +\$45** (+4.5% on the bankroll). If all 8 hit: **\$2,226 returned (+\$1,226)**. If everything dies: **-\$1,000**. The longshot doubles down on our three value legs — if the card has a great day, it has a very great day.
